

VESSEL CONFIGURATOR

ESTIMATING	ENGINEERING
<p>\$6,500.00/Month setup fee of \$35,000</p>	
<ul style="list-style-type: none"> • Import Compress, PV-Elite and AspenTech/BJAC analysis files • Real-time 3D vessel and component graphics • Components created from import file • Optional costs and subcomponents built using the configuration (e.g. vortex breakers and inlet diverters) • Proposal document PDF with vessel specification and quote • BOM, labor, and cost exported to Excel 	<ul style="list-style-type: none"> • Ability to add, edit, and delete components imported from the analysis file (e.g. delete a nozzle) • Ability to edit component locations • General arrangement drawing <ul style="list-style-type: none"> ○ Single sheet dwg format ○ Three orthographic views and one iso view ○ Overall dimensions and top level component location dimensions ○ Parts list with balloons annotations to top level components ○ Custom drawing template • Inventor 3D CAD models ready for further customization

- Subscription based Estimating and Engineering Department, available from anywhere anytime.
- Instant estimates and BOM details.
- CAD outputs are emailed to you within minutes.
- Setup fee includes your proprietary:
 - Pricing
 - Branding
 - Drawing Templates
 - Quote Templates
 - 3D CAD Model Mapping

*Custom development may be added for an additional fee. Typical customizations include: Support for additional analysis import files, other CAD platforms, custom vessel and component logic, ERP integration, DXF file export, and additional outputs.
