SPRINGFIELD, MO – Following the announcement made by Autodesk® of the release of Inventor iLogic 2009 extension, D3 TECHNOLOGIES announces that it will now be offering exclusive Inventor iLogic 2009 training for its customers. D3 is the leading provider of Autodesk manufacturing and plant solutions for the Central United States.

The Inventor iLogic Extension 2009, available only for subscription customers, enhances the parametric design capabilities of Inventor 2009 software by providing a powerful, yet simple solution for rules-based design. It enables Inventor users to easily create “smart” parts and assemblies that define multiple product configurations and automatically update in real-time. Inventor iLogic dramatically simplifies rules-based design with clickable tools that any Inventor user working at the individual and engineering workgroup level can use, even those with little or no programming experience.

“We are very excited about the release of this powerful new tool for Inventor 2009. We are constantly searching for better solutions to our customer’s requests. With Inventor iLogic, our subscription customers have the opportunity to customize and improve Inventor to their specific needs. We hope to help our customers take advantage of this tool by offering them training classes to get them up to speed quickly,” states Kevin Schlack, D3 TECHNOLOGIES President.

D3 will be offering the following classes:

iLogic for Inventor Users - A 16 hour class designed for Inventor users, no prior programming experience is required.

iLogic for Programmers - An 8 hour advanced class designed for Inventor users who have prior programming experience.

D3’s training classes will be taught by Autodesk Inventor Certified Professionals. For more information on dates for these new classes, please visit www.d3tech.net and check out your local area’s training calendar or contact us at (877) 731-7171.

About D3

Founded over 10 years ago, D3 Technologies is a mechanical computer-aided design (MCAD) consulting firm with nine offices located in Springfield, Mo., Kansas City, Mo., St. Louis, Mo., Tulsa, Okla., Oklahoma City, Okla., Little Rock, Ark., Wichita, Kan., and Memphis, Tenn. D3 focuses on delivering the full Digital Prototyping solution for the manufacturing industry through 2D/3D design, simulation, visualization, data management and knowledge-based engineering. For more information on D3, please visit www.d3tech.net or call 877.731.7171.

the leader in autodesk manufacturing & plant solutions.
