SAINT LOUIS, MO – D3 TECHNOLOGIES, the leading provider for Autodesk® manufacturing and plant solutions, is pleased to announce a new addition to the D3 Team in St. Louis, Steve Schnelker. Steve brings 25 years of design, engineering, manufacturing, and software development experience to his new role as D3's St. Louis Regional Sales Manager.

Steve graduated from Iowa State University in 1984 with a degree in Industrial Engineering. He has extensive experience in the manufacturing industry, working as a manufacturing engineer, program manager, and sales representative for such companies as Boeing Defense and UGS. Steve is familiar with numerous CAD software programs including Unigraphics, Dassault, and Autodesk products.

“Having previously worked with Steve, I’ve always known he would be a perfect fit for our team at D3. He has the unique experience and knowledge to uncover engineering inefficiencies and leverage our technology to make our clients more successful,” states Kevin Schlack, D3 President.

As a manufacturing specific solutions provider, D3 is always searching for team members with expertise in the industry. Steve's 25 years of experience makes him a perfect match for the team, and a great asset for the St. Louis area manufacturing community.

“I’m excited about this opportunity to join D3. I’ve watched them grow over the years into a company completely focused on their customer’s success. Any value added reseller can sell the software, but D3 goes much further in assuring their customer’s return on investment by offering more quality customer support, training, customization, and consulting than most,” adds Steve. Please contact Steve for all of your Autodesk Manufacturing & Plant requirements in the St. Louis area:
