

A COALITION OF BRANDS

Team D3 is positioning its CAD LIVE Training Platform as the standard for continuous professional development.

Springfield, MO – January 12, 2023 – Team D3 is expanding its CAD LIVE training platform to become a standard for providing ongoing education to a variety of industries, including Manufacturing, AECO, and Plant & Process professionals, further solidifying their role in each respective industry.

Team D3, a commonly owned coalition of brands consisting of [D3 Technologies](#), [MG-AECO Technology Partners](#), and [ECAD Inc](#), will be expanding its [CAD LIVE Training](#) platform to offer a wider variety of [Training Plans](#) and position the platform as the standard for continuous professional development. After years of heavily investing in expanding their talents, capabilities, and expertise through various strategic partnerships and acquisitions, Team D3 represents a convergence of knowledge bridging the gaps between the Manufacturing, AECO, and Plant & Process industries. The CAD LIVE Training platform provides professional development opportunities for all of these industries. Team D3's customers have found great success with Training Plans that offer a streamlined, cost-effective solution to train new hires and provide ongoing professional development.

The Training Plans that Team D3 provides are focused on training professionals in the AECO and Manufacturing industries, but will soon include a broader range of offerings. The CAD LIVE training platform currently enables Team D3 to deliver over [150 individual Autodesk courses](#) covering a large array of Autodesk products and software to students nationwide. The platform leverages cloud-based technology to simulate a traditional classroom in a remote and digital environment. Students have the ability to interact with a geographically diverse class, participate in live lectures and demonstrations with a certified Team D3 instructor, and practice hands-on with their own remote computer. All software and class files are provided through the platform.

“Autodesk assessed multiple delivery platforms for training their educational partners and chose Team D3’s CAD Live platform as their standard,” says Team D3 CEO and Founder, Kevin Schlack.

“CAD LIVE is all about connection - connecting our passionate industry-professional instructors, students who are eager to learn new skills, and the technology that makes it all possible,” remarks Team D3’s Manager of Education Programs, Ryan Johnson. “With our growing catalog of courses, Team D3 has taught over 4,000 students nationwide just in the last year. Many of these are part of our Evolve training plan, which provides subscription-based live training with unlimited access to all included courses. With CAD LIVE, Team D3 is proud to help our clients build the world around us!”

As a result of this coalition, Team D3 expects their CAD LIVE training platform to become a standard for providing ongoing education to a variety of industries, including Manufacturing, AECO, and Plant & Process professionals, further solidifying their role in each respective industry.

About D3 - D3 Technologies is an Autodesk Platinum-level partner dedicated to Autodesk manufacturing solutions in North America, including being a valued integrator of Autodesk manufacturing and plant solutions. From the initial concept to the final product - D3's solutions will transform your manufacturing and engineering operations by improving workflows, aligning you with the right technologies, and providing educational pathways and support. D3 has been a trusted partner to US manufacturers since 1999, and we will continue to partner with those that demand the best.
