

*Design Better.
Manufacture Better.*

Who We Are

D3 Technologies is a trusted advisor to manufacturers nationwide and a world-class integrator of manufacturing engineering and design solutions. From initial concept to final product, we transform the way you make things. The catalyst is D3's proven approach to optimizing your workflows and alignment with the right technology, education and support.

“ Many service companies throw it around, but D3 truly is the epitome of ‘Trusted Advisor’ ”

- Jason Klein, President of Cush

CAD TRAINING

Turn your engineering team into a competitive advantage by helping them be boost productivity through professional training.

CAD SUPPORT

Eliminate downtime by engaging with our real-time support team to overcome technical challenges in as shortest time possible.

CONSULTING

Achieve and maintain maximum engineering efficiency by partnering with us to establish lean engineering methodologies.

TECHNOLOGY

Integrate the right mix of engineering and design technologies seamlessly into your world according to your unique requirements.

*Design Better.
Manufacture Better.*

Why D3?

Because it's about YOU! We succeed only when you succeed!

You're not just a number to us! We care about your business, and we understand you need to make the best choice in an engineering and design technology partner for your success.

Because we were founded by manufacturing engineering professionals, and we are an Autodesk Partner focused 100% on manufacturing, D3 understands how to partner with your engineering and design teams to give your company the edge you need to get ahead and stay ahead!

- ✓ Autodesk Top 10 Loyalty Partner
- ✓ Autodesk Training Center of the Year
- ✓ Autodesk Partner of the Quarter (3x)
- ✓ Fastest Autodesk MFG Partner Growth (6x)
- ✓ Autodesk User Group Int'l Sponsor of the Year

Our Methodology

As a trusted advisor, we help manufacturing companies become more efficient, boost productivity and increase quality by invoking lean engineering principles similar to those of lean manufacturing.

First, we collaborate with key stake-holders to develop a master plan. This allows us to isolate target areas poised for improvement, prioritize them, and strategically execute on them.

The purpose to the lean engineering methodology is to increase the amount of valid engineering data (engineering intelligence) produced per dollar invested in your engineering assets (people, processes & technologies.)

A True Partner

We truly value the partnerships we have with all of our clients. While D3 partners with many Fortune 500 companies, over 50% of our customers have 3 or less engineers or designers. Regardless of size, D3 is a true partner delivering solutions to help all manufacturing companies pursue continuous improvement goals to increase productivity and profitability.

Many of our customers include us in their strategic business planning meetings to help them map out how achieving engineering efficiency can play a pivotal role in helping them not only reach their goals but to blow them away and crush their competition!
